

Monument of Dyado Yotso (Old Man Yotso)

Descriere

The Old Man Yotso architectural complex was built in 2005, being the work of the sculptors Monica Igarenska and George Tishkov. The main attraction is a 5 meter high statue of Ivan Vazov, made of white limestone from the quarries in the area. The idea to raise this statue belonged to a citizen of the region, named Ognian Petrov, who benefited from the support of the municipality of Mezdra, but also from donations from other citizens, delighted by this initiative. It is a cultural complex that includes many other works of art, and every year there is a literary prose contest, as well as a national festival of folk music.
